

GENERAL MIXING INSTRUCTIONS – 12" HOLE & DOWN

Per 500 Gal

RheoXanD

For use with or without bentonite. Add 0.5 – 2 jugs until viscosity reaches desired level.

RheoPac

For use with or without bentonite. Add 0.5 – 2 jugs as needed for fluid loss control.

LiftGuard^{DRY}

Prehydrate bentonite in water. Add 0.5 – 2 jugs for maximum hole cleaning and cuttings transport.

HydroPH⁺

Prior to making bentonite additions to the water, add 0.5 – 2 jugs directly into the fluid or through the mixing hopper. Then add bentonite.

Available in ½ gallon jugs and 5 gallon buckets.
